EXPO Milano

Ticino is a Swiss Canton with Italian language and culture, and it has been part of the Swiss Confederation since 1803. Over 50% of its mountainous territory is composed of

tan area of San Francisco, where many Ticino people emigrated to during the 19th century. Those who live or spend their holidays in Ticino have, at their disposal, countless opportunities for entertainment on hundreds of kilometres of hiking trails or mountain roads, golf courses, areas dedicated to classical music, art galleries and museums, as well as casinos, water parks and spas, not to mention shopping, from locally made products to fashion and luxury brands.

The Canton Partners of St. Gotthard at EXPO Milano 2015: «Water for Europe»

Within the St. Gotthard 2020 Program (PSG 2020), a common project of Cantons Uri, Ticino, Valais and Grisons, the Cantons that are partners of St. Gotthard, will be present for the duration of EXPO Milano in the Swiss Pavilion with their own exhibition space centred on the theme: «Water for Europe». From the Gotthard mass, a water reservoir and source of the four major European rivers (Reuss, Rhine, Rhone and Ticino), flows the water that «feeds» all of Europe. The central element consists of a monolith in Ticino Granite, weighing twenty tons, which reproduces the St. Gotthard region to scale: surrounding the work are the four Cantons that are shown to visitors with an exhibition of images and interactive videos centring on three themes dedicated to tourism, the economy and culture.

Digital processing of the exhibition space.
