

ABB is a pioneering technology leader in electrification products, robotics and motion, industrial automation and power grids, serving customers in utilities, industry and transport & infrastructure globally. Continuing a history of innovation spanning more than 130 years, ABB today is writing the future of industrial digitalization with two clear value propositions: bringing electricity from any power plant to any plug and automating industries from natural resources to finished products. ABB operates in more than 100 countries with about 135,000 employees, thereof 6,000 in Switzerland.

ABB Power Protection was founded in Ticino, Switzerland in 1993 and is part of the ABB Group since 2012; it develops and produces technologically advanced UPS systems for mission critical applications. Its main operations are based in Quartino. ABB Power Protection introduced modular and transformer-less UPS technology to the UPS market, these are now the most important architectural trends in the UPS market today.

ABB Power Protection is offering An Internship opportunity in the Quality Department

Title: Employee training intern

Description and main tasks:

- Improve current training matrix to assure all employees receive and maintain the necessary training for their tasks
- Define the existing documentation needed and any gaps to insure quality work
