

ASRT Workshop on cancer registration and coding

Locarno, Istituto cantonale di Patologia, via in Selva 24

2-3 september 2004

Thursday, 2

- **11.00** Welcome (L.Mazzucchelli)
- **11.05-11.30** Data exchange with CF (P. Pury)
- **11.30-13.00** Colon: Standardization of morphology coding in colon cancer (P. Pury, J.M. Lutz); Coding exercises round 1 (I. Neyroud-Caspar, A. Bordoni et al.)
- **13.00-14.00** Lunch
- **14.00-15.30** Death certificate: data validation, situation at CF and discussion (P. Pury). Coding exercises round 2: DCO, DCI (I. Neyroud-Caspar, A. Bordoni, et al)
- **15.30-16.00** Pause
- **16.00-17.30** Cases with inaccurate or lacking information (probable, possible, uncertain....). Are they to be registered and how should they be coded? Example & exercises round 3 (I. Neyroud-Caspar, A. Bordoni, et al)

Friday, 3

- **09.00-09.15** FISH method to evaluate the level of amplification of Her2/neu gene in breast cancer (V. Martin)
- **09.15-09.30** Changing methods in prostate cancer diagnosis. Some consideration on Ticino data and impact on incidence (F. Montanaro)
- **09.30-10.30** Biobanksuisse and population based cancer registries: what can Cancer Registries do and preliminary project Ticino. Presentation and discussion (J.M. Lutz, F. Montanaro)
- **10.30-11.00** Pause
- **11.00-12.00** Items needed for an evaluation of completeness of cancer registration: method description and examples (F. Montanaro, J.M. Lutz)
- **12.00-13.00** Overview of future.(JM. Lutz)
